

## ASPIRUS ANYA MARIE JACKSON NICU GIFT

PHOTO AND CAPTION INFORMATION COURTESY MARY DOBECK

On July 19, a special celebration was held at the Aspirus Anya Marie Jackson Newborn Care Unit (NICU) to thank the B.A. & Esther Greenheck Foundation for their gift of \$27,571. This special gift will advance the level of care provided to babies in the Anya Marie Jackson NICU by providing the following state-of-the-art technology: 1. Advanced Neonatal Simulator Manikin and training for health care professionals who provide specialized care for critically-ill newborns. 2. High Intensity Bili Blanket Unit to help reduce the amount of bilirubin in the baby's skin to assist the liver in regulating the level of bilirubin in the blood, and prevent jaundice and potential brain damage from high bilirubin levels. 3. Portable Neopuff Infant Resuscitation Units to protect babies during resuscitation to ensure the safety of their lungs and delivery of the appropriate amount of pressure needed to give a baby a breath. Because of this gift and partnership, babies' lives will be protected so they get the best start in life possible! Thank you!
